

Honored 100 Presidential Awardees

With Gratitude

It is with the deepest gratitude that we honor the 100 Presidential Awardees named in this booklet for significant contributions made in a diversity of ways throughout La Sierra's rich history – contributions to the university and its standing, to their chosen fields and the spirit of innovation and excellence, to the Seventh-day Adventist denomination of which the university is a part, and to the betterment of the Riverside community and wellbeing of society.

Our honorees hold various ties to the university and within their ranks are represented a broad cross-section of alumni, current and past faculty and staff members, administrators, community leaders and donors. Individuals were considered through a nomination

process that garnered many dozens of entries. The final selection proved a difficult task simply because the truth is that hundreds are responsible for La Sierra University's success over the decades and all deserve public recognition and honor. La Sierra University is truly indebted to all who have been instrumental in its remarkable and God-inspired journey during its first 100 years, for the solid foundation laid and the dedication that has nurtured the university's continual progress. We are grateful and honored by all who every day have lived out the university's mission of seeking truth, knowing God and serving others and we look forward with anticipation to our communal efforts under God's leading hand at ensuring the future of an institution that enriches this community and the world.
