	Electives to complete 190 quarter units	<u>-</u>	<u>4</u>	<u>4</u>
		17.0	16.0	16.0
	* Major Requirements + Program Prerequisites			

ACCOUNTING

B.S. Degree

CAREER OPPORTUNITY AND RELATED OCCUPATIONS: Four major accounting fields are open to the college graduate: public accounting, commercial/industrial, government, and education. Areas of specialization after the acquirement of basic experience includes financial accounting, cost accounting, auditing, tax practice, management advisory services, internal auditing, and controllership. Other career options include Actuary, Benefits Administrator, Financial Analyst, and Statistician.

EDUCATIONAL QUALIFICATIONS: Most accountant and internal auditor positions require at least a Bachelor's degree in Accounting or a related field. Preference is commonly given in all career positions to those with a Master's degree. Previous experience in accounting or auditing can help an applicant get a job. The Certified Public Accountant certificate is a desirable added qualification in all areas.

DENOMINATIONAL OPPORTUNITIES: A wide variety of positions in accounting and related areas are open, both in the North American Division and overseas, in health-care, publishing, educational institutions, and conference organizations.

JOB OUTLOOK: Employment of accountants and auditors is expected to grow faster than average for all occupations through the year 2014. An increase in the number of businesses, changing financial laws and regulations, and increased scrutiny of company finances will drive growth. In addition to openings resulting from growth, the need to replace accountants and auditors who retire or transfer to other occupations will produce numerous job openings in this large occupation.

SALARY: The National Association of Colleges and Employment reports that the national entering wage level for Spring 2006 for those with a Bachelor's degree in Accounting was **\$46,188** a year. Those with a Master's degree averaged **\$46,933** per year.
